

Dear Partners and Members,

A warm welcome to the 2nd issue of our newsletter. We hope you will enjoy this new way to keep you up to date with our activities.

ENEN Implementation team counts 4 members:

Dr. Gabriel Lazaro Pavel
Executive Director

Mr. Francisco Suárez Ortiz
Finance Coordinator

Ms. Roberta Cirillo
Communication Officer

Ms. Shaminder
Administrative Controller

LAUNCHING A NEW PLATFORM!

To enable people to easily subscribe to their favorite courses, ENEN launched a new platform: <http://apply.enen.eu/>. Still in its baby shoes, we look forward expanding the catalogue of E&T initiatives, accessible from there.

ENEN WORKING GROUPS

Every year, on the proposal of the Board, the General Assembly approves a list of actions to be performed during the coming year, as well as the list of persons in charge.

These actions are pre-selected by the Board at the suggestion of the ENEN Members, the Partners of the Memoranda of Understanding and the Executive Director. Each action pertains to a Working Group.

A Working Group dedicated to the action is set up and its Leader is nominated by the same General Assembly.

Each Working Group belongs to one of the 5 possible Working Areas but others may be constituted:

- Teaching Academic Affairs Area (TAAA)
- Advanced Courses and Research Area (ACRA)
- Training and Industrial Project Area (TIPA)
- Quality Assurance Area (QAA)
- Knowledge Management Area (KMA)

Further information on our website, on the [dedicated page](#).

A Word from our President:

Dear ENEN Members,
Colleagues and Friends,

2021 started with us still keeping distance and working remotely, nonetheless ENEN didn't stop pursuing its mission and several activities have been put in place.

The first quarter of the year witnessed the organization of a workshop on "Distant Learning" specifically for ENEN members, which was highly appreciated by the participants. Furthermore, we had the organization of ENEN Annual Special Event and General Assembly, for the first time entirely online.

The Special Event took place on March 4th and saw the participation of more than ninety people belonging to the Education & Training Community.

We took the opportunity to present all projects ENEN is currently involved in (more info [here](#)) and we welcomed some further speeches by representatives of our international members presenting even more initiatives which are in place to facilitate the networking and exchange within our community.

FOLLOW UP ON OUR INITIATIVES

All the mentioned projects have received funding from the European Commission.

ELSE: European Leadership for Safety Education. ENEN joined the team at the beginning of 2021, replacing ENSTII. The main aim of the ELSE project is to develop a new research-based approach for education in the domain of safety leadership. More information at [this link](#).

ECC-SMART: Joint European Canadian Chinese development of Small Modular Reactor Technology. A brand new newsletter to stay up to date with this project is available for download, on our website, [here](#).

TOURR: Towards optimized use of research reactors in Europe. Coordinated by ENEN, this project had its first plenary meeting to assess activities status developed in the initial 6 months. To know more about the project, please visit: [this link](#)

A-CINCH: Augmented Cooperation in Education and Training in Nuclear and Radiochemistry. The first reporting period for this project has come, soon the 1st plenary meeting will take place. Meanwhile, it is possible to browse the official website, always reachable through us. [Here](#).

GRE@T PIONEER Graduate education alliance for teaching the physics and safety of nuclear reactors. The official website of the project has been launched, it is reachable through the dedicated webpage on [our website](#).

SaTE: Safeguards training and education. A 1 week condensed course, organized by [ESARDA](#), will be organized in mid-April. Focus of the training: Nuclear Safeguards and Non Proliferation.

ENENplus: Attract, Retain and Develop New Nuclear Talents Beyond Academic Curricula. This project is approaching its conclusion but a few more last events are about to come. Stay tuned to know more!

A glimpse to the FUTURE

ENEN will contact its members to gather ideas in the view of the incoming new EURATOM call. ENEN intention is to draft a proposal for a new project in which **we will collaborate to attract, develop and retain people in the broad field of nuclear applications.**

The day after the special event, as tradition claims, has been dedicated to ENEN General Assembly, my first as President.

I have to say I am honored to be the President of ENEN because I deeply believe in its mission and I think its role of networking and bridging gaps among E&T community members became even more crucial in these times.

Take care and stay safe!

Jörg Starflinger

ENEN Events & Initiatives for members**New members & MoU renewals**

EFOMP is the newest member of ENEN. The European Federation of Organisations For Medical Physics joined us in March 2021.

We renewed several MoU (Memorandum of Understanding) with [FuseNet](#), [UNENE](#) and [IAEA](#).

Workshop on Distant Learning

On February 12th, we organized a workshop for our members, to have an open discussion about “Strategies to optimize distant learning”. It featured two keynote speeches, given by Prof. Ch. Demazière (Chalmers) and Jose Luis Delgado (TECNATOM). Participants were distributed among academia and professional training allowing to get interesting insights on how to tackle this challenge of teaching and training from distance. Given the positive feedback provided by the participants, we will definitely organize more similar events.
