

NUCLEAR EDUCATION AND TRAINING

NOV 15 - 17, 2021, BRUSSELS, BELGIUM

European
Commission

Call for abstracts

Introduction

NESTet is an important international forum to discuss opportunities and challenges in nuclear education, training, knowledge management and human resource development related to nuclear energy and other nuclear applications. The 2021 edition will bring together nuclear stakeholders including policy and decision makers, educators, training providers, employers and human resource managers. Our Young Generation - incoming nuclear professionals - will be there to challenge established views and enrich the discussion!

Conference topics

NESTet calls for abstracts for oral and poster presentations providing insight in the activities of all nuclear stakeholders to attract, develop and retain the workforce. These include:

- Current best practices in education and training.
- Future needs from end users in terms of workforce.
- Capacity building including skills and competences.
- Success stories in attracting, developing, and retaining talent.
- New! Attracting and retaining – changes expected post COVID
- Innovative pedagogical approaches, technologies, and methodologies.
- Developing leaders in culture for safety and project managers.
- Networking and creating international relations.
- Other related topics.

NEW! The event will combine an in-person conference with an online event which allows delegates who cannot or who don't want to travel to Brussels to participate and present their paper.

Target public

Attendees of NESTet will be able to share their experiences and network with:

- Directors, managers and other experts active in recruitment, education and training in industrial, regulatory, policy making, academic, research and technical support organizations.
- Teachers, trainers, tutors.
- Students, trainees, tutees.
- Researchers in nuclear disciplines.
- Strategic planners of nuclear applications in industrial and governmental environments.
