

YOUNG GENERATION SESSION GUIDELINE

DigiDecom 2022 - International workshop focusing on digital transformation, robotics and other game changing trends in nuclear decommissioning

With this document we provide information for **students and PhDs** interested in participating in our Young Generation Session. We are offering free access to the event for five students who submit an outstanding paper to DigiDecom until September 30th 2022. Students and PhDs who will take part online, will have the possibility to win 1 of 3 awards. More information about the DigiDecom is available on:

<https://ife.no/en/project/digidecom-decom-innovation-events/>

Introduction

Supporting the Young Generation is an integral part of the DigiDecom. Participants from all around the world and many professionals in the field of nuclear physics, nuclear engineering and the nuclear industry will participate in the event, on-site in Halden/ Norway as well online on the atomondo hub <https://atomondo.expo-ip.com>.

DigiDecom taking place on October 18th – 20th 2022

By participating, you will not only have the chance to win one of our five free of charge access to the DigiDecom, but also one of the three awards. More importantly, you will have the opportunity to present your project to competent participants. You may even be addressed by others with beneficial possibilities for your future career.

Oral presentation on-site in Halden

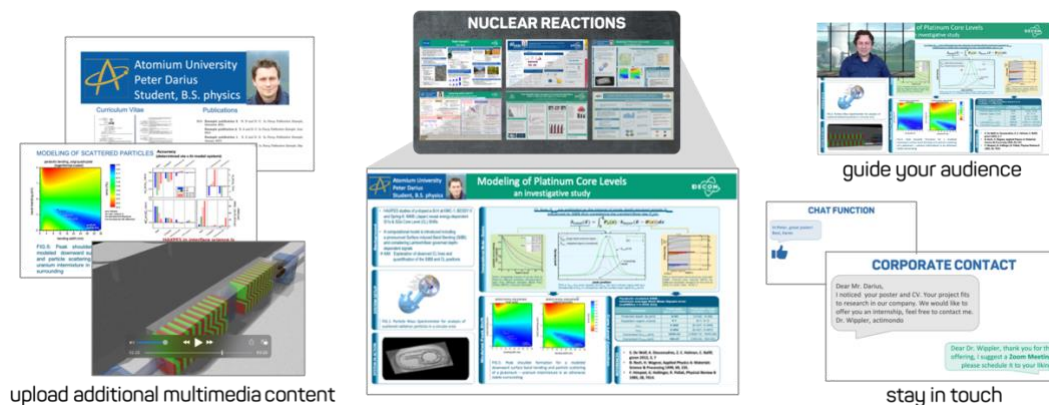

There will a Young Generation Session, which offers five students and PhDs the opportunity to present their scientific work. You will have 10 minutes to present your topic to the international audience. If you want to apply for these five slots, please send us your proposal, which consists of your presentation title, your name, your institution and a short abstract of maximum 150 words.

Deadline for oral presentation application is

September 30th 2022

The online poster presentation

As a hybrid event the DigiDecom offers exciting ideas for poster presentation. Individual posters can be equipped with multimedia content (e.g., your CV, detailed information or videos) for an interactive experience. You can even embed a guided presentation to playback for viewers even in your absence. Be creative! The poster presentation will be an integral part of the Young Generation Session of the DigiDecom and will be hosted at the atomondo hub.

How can I participate in the online poster presentation?

Please contact us about your interest to participate in the poster session. Next, download the [poster templates via this link](#) to set up your poster. Send the final poster to the email address, show on the last page of this guide. The poster templates serve as an orientation format. You are also welcomed to use your own design. If your poster is accepted, we will offer you access to your personal poster board. The poster board is your personal space on the atomondo platform in your web browser to setup your poster to your liking. It offers a simple user interface to display your project optimally with little effort. Here, you can upload and modify your poster, and even integrate multimedia content for an interactive experience, like audio or video related to your project, modeled animations, or a guided presentation for viewers in your absence.

For reasons of preparation, we need to set a deadline for poster submission. Posters will be arranged according to the order of registration.

Deadline for poster submission is September 30th 2022

Are there restrictions concerning the poster subject?

Due to the fact that the conference is addressing the nuclear community, the subject must fit the field of nuclear decommissioning and waste management. Take a look at our **DigiDecom program** for orientation.

Awards for the participants

As participant of the poster presentation, you will have the opportunity to present your project to competent participants on an international stage. You may even be addressed by others with beneficial possibilities for your future career.

If your poster is rated as the Top3 you will even win one of our three poster awards.

1st Prize – 3 weeks nuclear expert coaching

You will get three weeks coaching by a nuclear expert. This coaching includes three exclusive sessions, where your actual status is analyzed in respect to your further professional career development. You want to work in the nuclear industry, focus on a scientific career or want to start-up your own business. No problem, you will get advice and discuss with the expert your personal perspective.

2nd Prize – Business talk with an expert of the nuclear industry

You will have the opportunity to speak one-on-one with a decision-maker in the nuclear industry and learn valuable first-hand information. To prepare you for this interview, you will receive an introduction from us. In the interview with us, we will also prepare you to ask the right questions and to present yourself optimally in a pitch.

3rd Prize – Voucher in the amount of 175 euros

For your studies you will regularly buy books or hardware. With the voucher from Amazon in the amount of 175 euros, you can buy the right product at your own choice. We wish you much success with it.

I have further questions that are not addressed here

Visit the [DigiDecom homepage](#) for further information. Here, you will find more details about the DigiDecom itself, the workshop agenda and our professional speakers, the accompanying exhibition, future perspectives, and much more. If still questions remain or you need further support, you are always welcome to contact us:

John.kettler@actimondo.com (Chair of Young Generation Session)

bellingan@fh-aachen.de (Co-Chair of Young Generation Session)

Best regards,

Your DigiDecom team
